**Re: In the Matter of Petition of USTelecom for Forbearance Pursuant to  
47 U.S.C. Section 160(c); WC Docket No. 18-141; Category 1**

Dear FCC,

Please do not allow the take away of access to critical unbundled network elements from smaller IPS that is creating good competitions for large IPS such as AT&T and Verizon. I have AT&T for as long I can remember until I finally had enough of the way they serve their customers in recent years. They had gotten so big that they lost their ability to provide consistent good customer service and they are getting more greedy each passing day by nickel and dime you on their multiple price level internet service plan.

I signed up for Sonic because they were simple and honest, one price and one speed to cover my needs and they have the best customer service that I have ever come across. Sonic finally offered Fiber in my neighborhood and they made it so simple to convert my DSL to Fiber gigabit and Im still paying the same price(That's \$50 for 1000mps service and phone). This increased in speed has served my family of four well! The last I checked, AT&T was charging about \$120 for 1000mps/phone.

I appreciate company like Sonic who literally is practicing certain values that allows people to realize that you can run a business without feeling like you are being taken advantage of everyday. As a society, we cannot afford to loose businesses like Sonic. They help keep the big ones in check and perhaps ultimately they too can follow that model so that the whole society can benefit and practice honesty and integrity with each other as well.
